# LAUDABLE LAUNDRIES

The laundry in the American home has emerged from the dark ages of the utility room into a bright new era of beauty as well as function, thanks to the multiple advantages of built-in cabinetry. On the style scene, laundries are increasingly being given the same respect as the kitchen with furniture quality cabinetry – quite different from the plain white, utilitarian looks of the past. Upgrade your laundry for beauty and convenience with custom or semi-custom cabinetry.

Choose semi-custom cabinets designed with laundry functions like:

- dual sorting hampers
- slide-out shelving for laundry supplies
- sink base cabinets commodious enough for a large laundry sink
- built-in waste baskets
- ironing board built into drawers or wall
- tall cabinets with hanging bar and shelving for out-of-season items or items waiting for repair or ironing

For laundries coupled with or adjacent to a mud-room or utility entry, lockers make perfect sense. Create them from built-in cabinetry!

Another laudable feature of custom or semi-custom manufactured built-in cabinetry for the laundry is their moisture resistant finish. Use it with full assurance that your cabinetry will withstand the laundry environment and stay beautiful for years to come.

A well-equipped laundry is a time-saver that takes the drudgery out of time spent doing family laundry. Built-in cabinetry makes it all possible!

Your **Floor To Ceiling**<sup>®</sup> designer will show you how to use cabinet components to create a laundry you'll love!
